CAN-HAMMER

DESCRIPTION

CAN-HAMMER is an environmentally conscious rock drill oil that delivers superior lubrication for down-the-hole hammers. Because of its high polarity, and lighter viscosity, this vegetable oil-based lubricant protects every part of the hammer and is highly resistant to heat and high water pressure. CAN-HAMMER will extend the life of your DTH hammer and will improve overall performance.

APPLICATION

CAN-HAMMER is a high-performance environmentally conscious lubricant that extends the performance of all percussive hammers. It can be added directly down the drill pipe, or used with all in-line lubricators.

ENVIRONMENTAL BENEFITS

- Sustainable vegetable base
- Environmentally conscious
- Prevents surface and ground water from being contaminated
- Easier disposal
- Less waste
- Less CO2 emissions

ECONOMIC BENEFITS

- Maintain a constant penetration rate of the hammer
- Prevents piston scuffing and heat build up
- Extends the performance of all hammers
- 30% less consumption than conventional rock drill oils

USAGE

We always recommend constant lubrication, so for the best results use CAN-HAMMER with an in-line lubricator, at a rate 30% less than hammer manufacturers specifications.

**"A little CAN-HAMMER goes a long way!
I can use 30% less than what hammer manufacturers recommend!"
- Derek McDriller**
