CAN-HAMMER

SUPERIOR VEGETABLE OIL BASED ROCK DRILL OIL

DESCRIPTION

CAN-HAMMER is an environmentally conscious rock drill oil that delivers superior lubrication for down-the-hole hammers. Because of its high polarity, and lighter viscosity, this vegetable oil-based lubricant protects every part of the hammer and is highly resistant to heat and high water pressure. **CAN-HAMMER** will extend the life of your DTH hammer and will improve overall performance.

APPLICATION

CAN-HAMMER is a high-performance environmentally conscious lubricant that extends the performance of all percussive hammers. It can be added directly down the drill pipe, or used with all in-line lubricators.

USAGE

We always recommend constant lubrication, so for the best results use **CAN-HAMMER** with an in-line lubricator, at a rate 30% less than hammer manufacturers specifications.

ECONOMIC BENEFITS

- Extends the life of your DTH hammer by up to 80%
- Maintain initial penetration rates for a longer duration
- Prevents piston scuffing and heat build up
- Enhances the performance of all DTH hammers
- 30% less consumption than conventional rock drill oils

ENVIRONMENTAL BENEFITS

- Sustainable vegetable base
- Environmentally conscious
- Prevents surface and ground water from being contaminated
- Easier disposal
- Less waste
- Less CO2 emissions

"A little CAN-HAMMER goes a long way!
I can use 30% less than what hammer
manufacturers recommend!"
- Derek McDriller
